Embarking on the Shed Hunting Journey: Meet Our Fast-Learning Pups!

written by Kris | March 1, 2024

Hey everyone,

Exciting news from Skyline Kennels — the shed hunt training has officially begun! It's been an exhilarating journey so far, and I couldn't wait to share our progress with all of you.

In our latest training session, we focused on building value for place with our pups. It was their first time being introduced to a place board outside of the kennel, and let me tell you, they are fast learners! It's incredible to see how quickly they adapt and excel in their training.

Now, I have some even more thrilling updates to share with you all. We'll be selling male and female as started shed dogs just in time for shed season! Additionally, we currently have 3 females available for those of you looking to add a furry companion to your family.

But wait, there's more! Even though these pups are on their way to becoming expert shed hunters, they're not done learning just yet. We'll continue to work with them on various training exercises until they find their forever families. From conquering obstacle courses to walking the woods with older shed dogs, they've been busy honing their skills and becoming well-rounded companions.

Here's a sneak peek at what our pups have been up to:

- Hunting for their kibble
- Conquering obstacle courses

- Walking the woods with older shed dogs
- Initial imprinting sessions to shed odor
- Introduction to water
- Starting various basic commands
- Litter trained
- Sleeping in individual crates
- Continuing to be socialized

If you're interested in learning more about our pups or want to inquire about details, feel free to reach out to Shannon at 812-528-1549. We'd love to chat with you and help you find the perfect addition to your family.

Thanks for following along on our shed hunting journey – stay tuned for more updates from Skyline Kennels!
